

➤➤ VOTE ALEJANDRA SOLIS FOR REGION 5 STUDENT REPRESENTATIVE!

My name is Alejandra Solis. I was born in Merida, Yucatan, Mexico and I am proud to be a Hispanic leader. I am currently a senior with a double major in Civil & Architectural Engineering at Texas A&M University-Kingsville. After completing my coursework, I plan to pursue my graduate degree in Civil Engineering. With enthusiasm, I am here to announce my candidacy for SHPE Region 5 Student Representative.

WHY VOTE FOR ALEJANDRA?

I am currently the Chapter President for 2010-2011 academic year at my university, and since my appointment, I have grown a lot as a person, and as a Hispanic leader. As a Chapter President of two Hispanic national organizations and a part of the Engineering Student Council at my school, I have built many leadership skills. I have learned how to delegate responsibilities with the Executive Board members, I am self-motivated and goal oriented person who is responsible and dependable. I believe I have gained the respect from the Hispanic engineering students from my university, and I have set a good example. Most importantly, I have learned to listen without being judgmental, and I honor other students' ideas, creativity and personhood. I believe cooperation and dialogue are critical to reach final solutions, and I believe in consensus and collaboration.

I am proud to say that I have increased membership this academic year by almost 400% in my university; and, now because of this increase our Chapter has increased the numbers of participants attending the RLDC and National Conference. I would like for every engineering student to know the importance of being part of SHPE.

I am a person of character, and take my responsibilities seriously. I am committed to, and believe in the mission and vision of SHPE. I am dedicated to the goal of developing a Hispanic organization of both quality and integrity. I earnestly feel this Hispanic organization should be involved in, and promote professional as well as educational excellence. As your regional student representative, I will continue to enhance students' success in engineering, math and science as well as promote the good reputation of this well respected organization by promoting the personal growth of the individual and the ideals of SHPE. I will focus on Region 5 goals, and create a strategic plan for our Region. My aspirations are to grow this organization with harmony, diligence, dedication and perseverance. In summary, I have demonstrated my skills to accomplish these tasks that will lead not only my local Chapter of SHPE, but also the Region into this growing nation of Hispanic leaders.
